Would the EPA be interested in partnering with San Juan County on this?

**Subject:** Fwd: Request for GIS assistance

Hello Trevor

Here is Kim's request. NASA is conducting the LIDAR flyover next week and was looking for a cost share partner. She is going to track down how much that would be. The LIDAR data could benefit the EPA for current and future mitigation/reclamation work and also aid in better landscape hazard analysis.

thanks

Jim

San Juan County Assessor

San Juan County is in need of GIS mapping assistance for the Gold King Mine Incident. The private property along the impacted corridor is comprised almost entirely patented mining claims. The existing maps have many inaccuracies and are sometimes shifted/stretched more than a 1/4 mile from true.

In order to determine land status for private property in the impacted corridor, the County Surveyor has proposed to survey approximately 20% of the corners along Cement Creek downstream of the spill.

The County needs GIS assistance to convert those new surveys, along with pdfs of other existing mineral surveys in the area, into the County GIS, and create maps for the County Assessor.

Kim Buck

San Juan County Assessor
